

Piedmont Aviation Component Services Opens New Landing Gear and Plating Facility

Greensboro, North Carolina --- JUNE 1, 2016 – TAT Technologies is pleased to announce that Piedmont Aviation Component Services has opened a new 82,000 sq. ft. (7,625 sq. m.) world-class landing gear repair and overhaul center in Greensboro, North Carolina, effective June 1, 2016. The new landing gear center is located adjacent to the Piedmont Triad International Airport at 7102 Cessna Drive.

The new facility enables substantial growth in landing gear repair and overhaul capacity and capability for Piedmont. The company currently specializes in large regional airline aircraft and provides services for major airline operators around the world. Piedmont's customer base also includes military and helicopter operators. Piedmont's strong relationship with the landing gear Original Equipment Manufacturers, coupled with its own in-house DER and engineering team, provides unsurpassed technical support and solutions to the operators. In addition to Piedmont's current expertise in managing landing gear services for the CRJ, ATR 42/72 and ERJ170/190 worldwide fleets, the company is now positioned for growth in larger aircraft applications in both the commercial and military aerospace segments.

The new Piedmont facility also includes a comprehensive 10,000 sq. ft. (925 sq. m.) chemical processing and plating plant. Capabilities include anodize, alodine, chromium, cadmium, sulfamate nickel, copper, temper etch and passivation. Extensive machining capabilities coupled with the chemical processing enable Piedmont to maximize throughput and minimize turnaround time for its worldwide customer base, providing an efficient one-stop shop.

Richard Reed, President and CEO of Piedmont Aviation, said, "The entire TAT Group and Piedmont Aviation team are extremely excited to be in our new facility. The new world class operations center will enable our company to continue to provide our commercial and military customers with even greater solutions to landing gear repair and overhaul services. This investment is a clear demonstration of Piedmont's extensive capabilities as a major MRO provider for operators around the world."

About Piedmont Aviation Component Services, LLC.

Piedmont Aviation Component Services, LLC, located in Kernersville/Greensboro, North Carolina, USA, is a wholly owned subsidiary of TAT Technologies. Piedmont Aviation Component Services offers extensive component maintenance and overhaul capability for the commercial, regional, corporate and military aerospace industry.
